The course is a great tool for jewelers to use to improve their knowledge of jewelry appraisal practice and is especially relevant for those just beginning their appraisal career. The course was founded on the fundamental principles of jewelry appraisals and provides a starting point from which jewelry professionals can build towards more technical education.

The home study course is followed by an examination to assess a jeweler's basic knowledge. Successful passage of the test will allow the jeweler to list their qualifications and experience.

Jewelry Appraisal Basics Table of Contents

- Section 1:** Introduction
